

نذير Natheer

Be Assured

Natheer" is designed to help organizations update the data of the people they deal with (such as customers and employees), by alerting them of any change in their status in official records, such as travel and life status, through the electronic linking with the data of the official authorities. The service is characterized by its efficacy in updating people's data to match the data available with the official authorities and, thus, raise the level of quality of personal data.
